

# 2025 Dietary Guidelines Advisory Committee Disclosures

All members of the 2025 Dietary Guidelines Advisory Committee (Committee) are in compliance with the Federal ethics laws and regulations governing conflicts of interest. All Committee members have complied with the reporting of all necessary financial information under these laws and any resulting recusal requirements.

In addition to the requirements under the Federal ethics laws and regulations, the members of the Committee are voluntarily disclosing relationships, activities, and interests that may potentially be related to the content of the Committee’s scientific review, as defined by the International Committee of Medical Journal Editors. “Related” means any relation with for-profit or not-for-profit third parties whose interests may be affected by the content of the Committee’s report. These disclosures represent a commitment to transparency and do not necessarily indicate a bias. The Committee works together to review the evidence on diet and health and to provide its advice. The decisions of the Committee are collective, and therefore, the Committee is providing its disclosures collectively. When more than one member reported a relationship with the same entity, the total number of members with that relationship is noted in parentheses. Disclosures reflect the past 12 months.

This form is an adapted version of the [International Committee of Medical Journal Editors Disclosure Form](#). The entries were last updated on March 13, 2023.

<b>All Entities with Whom Members of the Committee Listed a Relationship</b>
